KIET Group Of Institutions • Muradnagar, Uttar Pradesh
11/2025

Skills

Web Development, ReactJS, Node.js, JavaScript, HTML5, CSS3, Express.js, MongoDB, C++, APIS, GIT

Projects

- **WEATHER-4U** : It's a Weather App made using ReactJs . I used free APIs from Openweathermap.org to fetch data . It's also consisting feature of Autocompleting City Names in SearchBar using React Component. Used GeoDBcities API to fetch city Names . *Note: Data may not be real time since it depends on FREE API.*
- **TextUtils** : It's an Online Text editing App , made using ReactJs. Deployed using Github pages. Used : JAVASCRIPT , BOOTSTAP to implement it . Features:
    - Convert entered *Text to UpperCase and vice-versa.*
    - Convert text into *Alternate Cases.*
    - Tells about *No. of Words And Characters* Entered.
    - You Can also Copy Entered Text.
    - Also gives info. about average time to read entered
    - text based on standard Reading Data.
    - Also having *SWITCH-TO-DARK* Mode.
- **Portfolio Website** : I Built my portfolio website using HTML, CSS, SCSS, AND JAVASCRIPT.It consists all my educational qualifications and all my projects and contact details. I deployed it using Netlify. app , which provides free hosting of sites.
